CURRENT MANUAL PROCESS

REGISTER/BOOK TO LOG VISITOR INFORMATION

There will be registers or books in security gates / reception where user can enter his information and can proceed for the meeting

SECURITY VERIFICATION

Security will call the host over phone and take approval over phone

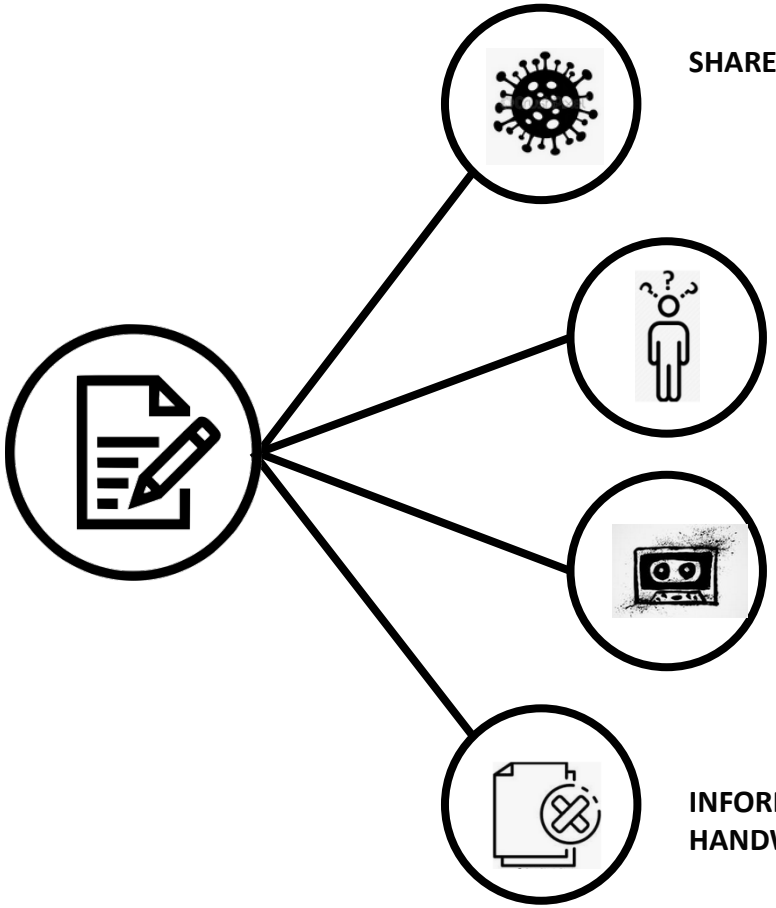
BADGE / LANYARD WITH PASS

Security will issue a badge or lanyard with a predefined number and this will get logged in the register and then visitor proceeds for the meeting

RETURN OF THE BADGE WHILE RETURNING

Visitor will return the badge while moving out and security will mark the exit time

DRAWBACKS OF MANUAL VMS



SHARED PEN / BOOK / LANYARD ETC. CAN SPREAD VIRUS

MANUAL RECONCILIATION IS HECTIC TO GET THE LIST OF VISITORS INSIDE. POOR DATA VISIBILITY TO MANAGEMENT

OUTDATED AND UNPREFESSIONAL, REDUCES THE BRAND IMAGE

INFORMATION IS NOT RELIABLE, ILLEGIBILITY IN HANDWRITING, MAY LEAD TO NON USABLE DATA

KEY BENEFITS

STALLION GROUP
INDIA | UAE | QATAR | OMAN

Avoid the spread of virus

VMS will help to avoid the shared usage of pen, register, lanyard etc. This will help to avoid the spread of virus

Centralized data

VMS will maintain the centralized data and can access in few clicks and maintain for a longer period

Enhance compliance

Keep a record of the Ins and OUTs of people will improve the visibility of the data with minimal efforts

Better brand image

Professional VMS in place of manual registers will help to improve organization's image

Strengthen Security

Know exactly who, where, why and when a visitor is onsite

Reduced the operating cost

Recurring Investment for manual registers and pen , time to reconcile data, space for keeping records etc will reduce drastically
